16 Port T1 VCL-MegaConnect-Jr. Digital Access Cross Connect Switch (DACS)

Product Brochure & Data Sheet
Introduction

The 16 Port T1 DACS - VCL-MegaConnect-Jr. is a T1 digital cross connect switch, presents its user an easy to use platform to cross connect up to 16 T1 ports. T1 Digital Cross Connect Switch offers full cross connect functionality to cross connect, and/or aggregate DS-0s, "n"x64Kbps consecutive data channels and fractional T1 channels to full T1 channels.

The 16 Port T1 Digital Cross Connect Switch occupies only a 2U high rack-space and is a complete 19-inch stand-alone unit that provides connectivity of up to 16 T1 ports. The unit operates on a -48V DC input power-supply (AC input adapter is optional).

The system is supplied with a CLI text-based, easy-to-use interface that offers the user complete control to prepare multiple configuration maps (and store them as data files) and the ease of downloading them from a PC. Dry contact relay alarms are also available at rear of the system to connect the system to an external alarm.

The 16 Port T1 Digital Cross Connect Switch also has a TCP-IP Access feature which allows the DACS to be connected on a TCP-IP network (10/100BaseT interface) for remote access for configuration and monitoring.

Applications

- Providing fractional T1s to subscribers
- Data aggregation from fractional T1 channels
- Cellular extending fractional T1 ports from MTSO to cell-sites

Highlights

- Stratum 3 clock
- Remote TCP/IP access for configuration and monitoring
- Text-based user-friendly CLI for easy configuration
- Telnet remote access
- Available in 16 T1 ports configuration
- 1+1 -48V DC Input Power Supply Redundancy (Dual Power Input allows the equipment to be powered from two separate -48V DC sources)
- SNMP traps
- Maintains Access Security Log
- USB and RS232, interface for local connection through the serial interface to the "Network Control and Management Software"
- User Selectable Internal, External and Loop-timed clock synchronization priority options
- Local and remote loopback facility.
1. **ISP Digital Cross Connect Application**
   providing fractional T1s’ to subscribers

Internet

Router

T1 DACS

Aggregates upto 15, fractional T1 channels to a single T1

2. **Backhaul-Cellular Application using T1-DACS**
16 Port T1 DACS - VCL-MegaConnect-Jr.

Features

- Provides DS0, "n"x64Kbps and fractional T1 grooming for up to 16 T1 ports
- Rear access
- User friendly CLI (text-based) commands
- RS232 serial, USB serial interfaces for local terminal access
- 10/100BaseT Ethernet Interface for remote access over an IP network
- Encrypted Password Protection
- Telnet – Remote access over IP links
- SSH – Secured remote access using Secure Shell Protocol over IP links
- SNMP Traps and NMS for real-time remote monitoring and management over an IP network
- Easy to install
- Configurable from 2 T1 ports to 16 T1 ports depending on user requirements
- LED indications on the front panel for alarms and status.

Benefits

- Reduce access costs by combining partially loaded T1s to a single T1
- Rear access wiring improves wiring and cable management
- Support Nx64kbps fractional T1 operation and grooming
- Easy to install and simple to use

OAM Features

OAM: Operation and Management Ports

- RS232 Serial Port
- USB COM Port
- 10/100BaseT Ethernet for remote access.
16 Port T1 DACS - VCL-MegaConnect-Jr.

Shelf Description
2U high standalone system

The 16 Port T1 DACS - VCL-MegaConnect-Jr. unit is a 2U, 19 Inch Shelf, fitted with a backplane that provides rear access of all external interfaces. The 1.5 Mbps electrical I/O, power input, alarm extension and the NMS port are all accessed from the backplane.

The 1.5 Mbps, T1 Interfaces are, 100 Ohms twisted pair RJ-45 connectors

16 Port T1 DACS - VCL-MegaConnect Jr.

Front view of the shelf

Rear view of the shelf
RJ-45 Version

100 Ohms, RJ-45 T1 Interface Connectors - 16 T1 Ports
1.5Mbps streams are accessible at the backplane. Access is also available for 2 alarm extensions. 48V power input is provided at the rear of the 2U shelf. The RS232 interface for monitoring and control is also taken from the rear panel of the stand-alone VCL-DACS unit.

1.5Mbps Ports (masking) of the 1.5Mbps ports that are not in use
creating a cross connect between T1s at DS-O level (single time-slot level) using the easy-to-use CLI (text-based) commands

Status Monitoring

- Clock Selection
- Status of alarms
- Enabled/Disabled status of 1.5Mbps ports
- Monitoring of the 16 Port VCL-MegaConnect-Jr. status and configuration
Alarm status, monitoring

- Loss of incoming signal at all 1.5 Mbps ports
- Configuration error alarm

In addition to the above monitoring facilities, 16 Port T1 DACS - VCL-MegaConnect-Jr. is provided with LEDs, which indicate various fault conditions.

Monitoring 16 Port T1 DACS - VCL-MegaConnect-Jr. via LED indications

- 1 to 16 T1 Ports LED indicators
- +3 V DC present
- -48 V DC present
- Configuration error

System Access, Control and Management Options

- Telnet
- SSH
- CLI Control Interface (HyperTerminal or VT100)
- SNMP V2 Traps (MIB File provided)
- GUI (Graphical User Interface).

Security and Protection

- Secured Access via SSH V2
- Password Protection: Password Protection in compliance with the mandatory clauses of the GR-815-CORE-2 specifications for secured access control.
- Logging: Maintains a log of all successful and un-successful attempts.
- Logged information includes the ID and the IP address of the accessing entities. Alerts the administrator if the un-successful logging attempts exceed 3.
- Security Audit: All access logs for at least last 1000 entries that are maintained in the system non-volatile memory for security audit purposes.
- Security log entry of any request or activity including that user-ID (including IP address, if applicable), to establish user
- Security Administration.
